## Successful implementations of Quantum Blue<sup>®</sup> TDM assays in routine practice

### Dr. Hans Peter Gröchenig

Head of Department of Internal Medicine, Convent hospital Barmherzige Brüder St. Veit an der Glan, Austria

### Dr. ssa Giuliana Cangemi

Head of the Chromatography and Mass Spectrometry Unit, Central Laboratory of Analyses, Gaslini Institute Pediatric Hospital in Genova, Italy

### Dr. Bernard Royer

Clinical Pharmacology and Toxicology Service, Centre Hospitalier Universitaire de Besançon, France

„TDM with Quantum Blue® is a very valuable tool for the clinicians to decide on dose increase or decrease as well as drug class switches.“

“When it comes to antibodies testing, the clinicians are satisfied with a qualitative response.“

„The primary motivation (...) was to reduce turnaround time.“

“Within 30 to 60 minutes we get the trough levels and can adjust the drug therapy in the same patient visit.“

„It is very important to combine drug level and calprotectin measurement for ideal treatment decisions.“

„We've significantly improved our ability to meet our clinicians needs.“

“The Quantum Blue® rapid TDM is easy and fast.“
